Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: As per the decision of the Board of Patent Appeals and Interferences (see pages 9-10), that Basore appears to use a different type of speech recognition system than Gupta and Basore uses his system to prevent problems relating to noise, reduced bandwidth and variations in acoustics in telephone handsets and discloses that the result of sending the phonetic spellings and identifiers to the voice activated system is that the voice activated device can then make extensive information quickly available to the user without requiring a high bandwidth network, and thus the Board decision of "we can find no teaching or suggestion in the prior art that would have taught or suggested an artisan to use the speech recognition method of Gupta in the voice activated telephone system of Basore," and "because if the limited computational ability of the processors in mobile phones, we fail to see how the phone of Basore could carry out the operations performed by Gupta in a mobile phone as recited in the claims."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
